1. Principal structure, labs and other facilities

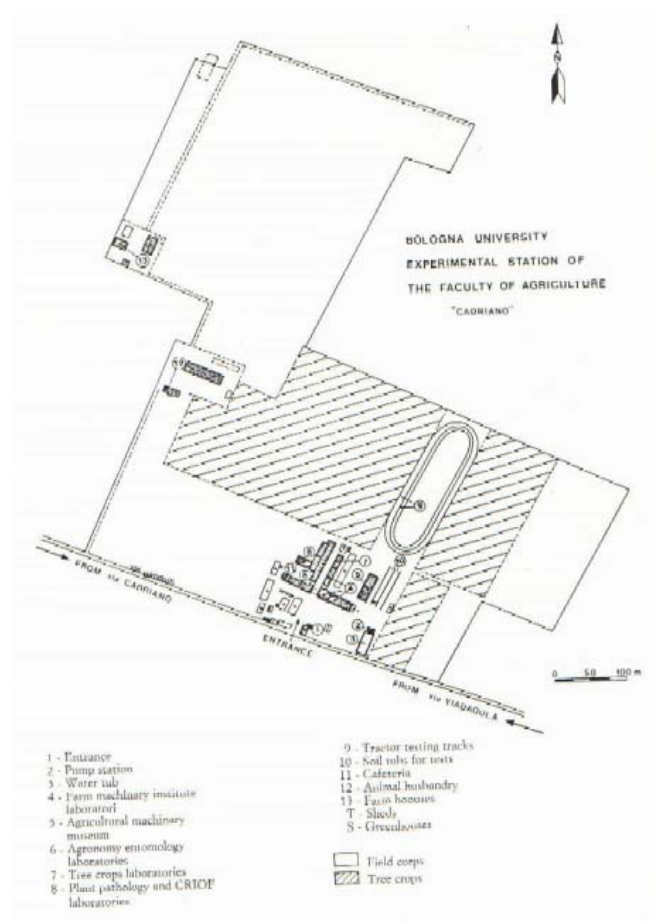

1.1. Main Campus – CAAB - Bologna

The new Faculty of Agriculture building comprises the Departmental offices, which are as extended as 4000 m², and is placed north-east of Bologna, in the vicinity of the Town Ring and to its exits 8 and 9. It is, moreover, adjacent to the CAAB - Centro Agro-Alimentare di Bologna, an important site for Bologna's topography.

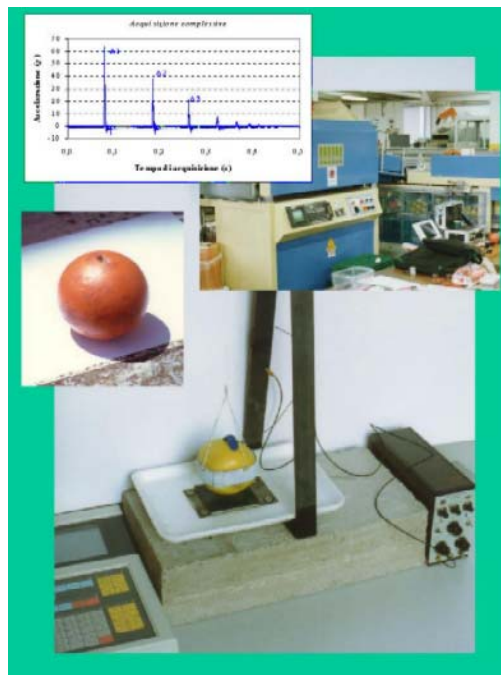

1.2. Experimental station - Cadriano

The didactical-experimental Centre of Cadriano, a few km far from the main Departmental site, occupies a surface of over 2000 m² and contains a soil mechanics and products laboratory, a mechanical workshop, a mobile laboratory on soil bins, specific spaces and devices for agricultural machines functionality testing, including two tracks (in concrete and tamped hearth) longer than 400 m, and equipments for agricultural machines noise testing in open space.

1.3. Off Campus research facilities - Cesena ($\approx 200 \text{ m}^2$)

Cesena's laboratory focuses on studying the physical-mechanics properties of the products with special care to the post harvesting damages. Specific devices are present to study the affection of vibrations on the quality of the products.

2. Staff
